

Article Overview

Galvanized cable tray supports typically range from \$10 to \$50 per piece, depending on type, gauge, and load capacity.

Overview of Galvanized Cable Tray Supports

Galvanized cable tray supports, such as GI C Channels and Z Supports, are designed to provide a sturdy foundation for cable tray systems in commercial and industrial installations. They are manufactured from high-grade galvanized iron, offering excellent resistance to corrosion, rust, and environmental wear, making them suitable for both indoor and outdoor applications (Elecload) .

Factors Affecting Price

- o Type of Support: C Channels and Z Supports differ in design and load-bearing capacity. Heavy-duty Z Supports generally cost more than standard C Channels.
- o Gauge/Thickness: Common gauges include 14 SWG, 16 SWG, and 18 SWG. Thicker gauges (lower SWG numbers) provide higher load capacity and durability, increasing the price (Elecload) .
- o Length and Size: Standard lengths vary, and longer supports or custom sizes may increase cost.
- o Supplier and Region: Prices fluctuate based on supplier, shipping, and local market conditions. Global factors like zinc prices can also impact costs (Accio) .

Typical Price Range

- o Light-duty supports (16-18 SWG): Approximately \$10-\$20 per piece.
- o Medium-duty supports (14-16 SWG): Approximately \$20-\$35 per piece.
- o Heavy-duty supports for high-load trays: Up to \$50 or more per piece, depending on length and customization (Elecload) .

Additional Considerations

- o Corrosion Resistance: Hot-dip galvanization and zinc coatings enhance durability, which may slightly increase the price but reduce long-term maintenance costs (Accio) .
- o Project Requirements: Industrial or outdoor projects may require thicker, heavy-duty supports, while standard commercial installations can use lighter options.
- o Availability: Online suppliers like Elecload provide easy access to various types and gauges, often with competitive pricing and delivery options (Elecload) . In summary, the price of galvanized cable tray supports depends on type, gauge, and load requirements, with typical costs ranging from \$10 to \$50 per piece, making them a cost-effective and durable solution for structured cable management systems.
