Cable tray accessories, including horizontal elbows, vertical elbows, and straight connectors, are essential components for efficient and secure cable tray installations in various industrial and commercial settings. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. These are suitable for laying cable in exposed area. Sized range from 50mm wide and 2. Materials used are hot dipped galvanized steel, aluminium, stainless steel, epoxy painted steel or FRP Fiberglass. Snap Track offers numerous fittings to make the system easy to install. The Snap Track system was designed and is intended to be used as a UL Classified continuous assembly of straight sections, fittings, and accessories used to form a structural support, for the purpose of supporting, protecting. Channel cable tray secures cables using Eagle Basket pre-punched holes. New pre-punched holes allow the secure attachment of cables to the inside of the channel without the need to drill holes, reducing labor and speeding up installation. It effectively reduces the overall tray width and provides a seamless transition between straight sections and fittings.

TechLine Mfg. manufactures long radius elbow fittings to enhance ease of use for Snap Track cable tray systems. These are available in vertical inside, vertical

Cable tray fittings like elbows, bends, tees, crosses, and risers are used to change the direction of cable routing. They allow cables to navigate corners, changes in
