

How much does an outdoor drop fiber optic cable weigh

Preview

They can weigh between 60 to 200 kg per kilometer (39.7 to 132 pounds per 1000 feet), depending on the design and materials used. However, some general guidelines can provide a rough estimate: Indoor Fiber Optic Cables: These are typically lighter as they require less protection. We supply FTTH Cable in competitive cost and short lead time. Our factory approved ISO9001:2015, and we have UL, CE, FCC, ROHS, CCC, CPR certificates. 5 Kg Weight, 1000 mm Height, 10 Impact at. An outdoor optical fiber drop cable--often called a fiber drop, outdoor drop cable, or drop fiber--is the short-run fiber optic link that connects a distribution point (pole, splice closure, or street cabinet) to the end user's premises (home, building, or small cell). These cable bridge the gap between an ISP's backbone infrastructure and end-user premises, enabling high-speed internet, voice, and data service in residential.
