

Article Overview

Easy-install cable trays in North Asia typically range from \$10 to \$50 per standard unit, depending on material, size, and surface finish.

Pricing Overview

Easy-install cable trays are available in steel, hot-dip galvanized, anodized, or anti-corrosion coated finishes, with prices influenced by length, width, side rail height, and load capacity . Standard lengths are usually 2-3 meters, and widths range from 50 mm to 900 mm, with side rail heights from 12 mm to 200 mm . For ladder-type hot-dip galvanized trays, the price is often calculated per 2.4-meter section, with fittings priced per unit .

Purchase Options

- o Factory-direct or OEM: Offers competitive pricing and customization for specific project requirements, including lightweight or frequency-compliant trays .
- o Wholesale distributors: Provide cost-effective bulk purchasing, often with volume discounts .
- o Online marketplaces: Platforms like Alibaba and Made-in-China.com list multiple suppliers with detailed specifications, allowing buyers to compare prices and request quotes .

Installation and Cost Considerations

Easy-install trays are designed for quick assembly and safe wire routing, reducing labor costs during installation . CE-certified steel trays are available for commercial projects, ensuring durability and compliance with electrical standards . When budgeting, consider tray type, surface finish, and required fittings, as these factors significantly affect total project cost.

Summary

For North Asia, expect per-unit prices between \$10 and \$50, with higher costs for larger, heavier, or specialized trays. Bulk orders, OEM customization, and factory-direct sourcing can help reduce costs while meeting project specifications .
