

Price of Assembled Fiberglass Cable Trays

Article Overview

Fiberglass (FRP/GRP) cable trays typically range from \$0.65 to \$25 per meter depending on type, size, resin system, and supplier.

General Price Ranges

- o Economical FRP Cable Ladders: \$0.65 - \$3 per meter for basic perforated or solid trays, suitable for light industrial or commercial use (MOQ varies from 1 to 100 meters) .
- o Standard Pultruded Fiberglass Ladders: \$3 - \$10 per meter, often used in chemical plants, offshore platforms, and water treatment facilities .
- o Heavy-Duty or Custom FRP Trays: \$10 - \$25 per meter for high-load, corrosion-resistant, or fire-retardant trays with specialized resin systems (vinyl ester or epoxy) .
- o Accessories and Fittings: Horizontal elbows, tees, reducers, and splice connectors typically add \$5-\$15 per piece depending on size and radius .

Factors Affecting Price

- o Material and Resin System: Polyester resin is generally cheaper, while vinyl ester or epoxy systems are more expensive due to higher chemical and temperature resistance .
- o Tray Type: Ladder, perforated, solid-bottom, or channel trays vary in cost; ladder trays are more expensive but support heavier cables .
- o Dimensions: Width, depth, and length directly influence material usage and price. Standard lengths are 3-6 meters .
- o Load Capacity and Durability: Trays designed for high uniform loading or extreme environments cost more .
- o Bulk Orders: Larger quantities often reduce per-meter cost by 10-40% .
- o Regional Factors: Shipping, labor, and local market conditions can affect final pricing .

Example Supplier Pricing

- o Alibaba Suppliers: \$0.65 - \$15 per meter depending on type and MOQ .
- o MP Husky: High-strength FRP trays with polyester or vinyl ester resin, ASTM-compliant, priced around \$1-\$10 per meter depending on specifications .
- o NHC FRP: Customizable trays with high corrosion resistance and fire-retardant properties; pricing available upon inquiry, typically \$3-\$20 per meter .
- o Spectrum7 Catalogue: PFL150 fiberglass ladder trays, 150mm height, 3-6m lengths, with elbows, tees, and risers; prices vary by resin type (FR, AS, VL) .

Cost Considerations

Price of Assembled Fiberglass Cable Trays

- o Installation: Labor is generally lower than metal trays due to lighter weight and easier handling .
- o Supports and Brackets: Can add 20-30% to total project cost .
- o Covers and Fittings: Required for outdoor or corrosive environments, increasing overall cost .
- o Customization: Special colors, lengths, or resin systems may increase price . Fiberglass cable trays offer lightweight, corrosion-resistant, non-conductive, and fire-retardant advantages over steel or aluminum, making them cost-effective over the long term despite higher initial material costs .

Choose Monterra International LLP for high-quality Fiberglass Cable Trays made to handle harsh

Price List Cable Tray 2024 - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online.

FRP Cable Tray are the best solution when putting in place an ideal cable management system, and you

Learn how to get quick and accurate cable tray pricing for your projects. This guide covers new builds, renovations,

FRP Cable Trays are non-metallic support systems for routing electrical and data cables in industrial and commercial facilities. Made

Discover cable trays with CE certification, available in stainless steel, aluminum, and galvanized materials. Ideal for
