

Article Overview

The price of an Explosion-proof Speaker Distribution Box varies widely depending on specifications, certifications, and order volume, typically requiring a direct quote from suppliers.

Price Range and Factors

Explosion-proof distribution boxes are specialized electrical enclosures designed for hazardous areas (Zone 1, Zone 2, Zone 21, Zone 22) and are IECEx and ATEX certified . The cost depends on several factors:

- o Specifications: Size, number of circuits, IP rating, and material (e.g., corrosion-proof aluminum) affect pricing .
- o Certifications: Compliance with IECEx, ATEX, or other regional standards can increase cost .
- o OEM/Customization: Custom branding, busbar configurations, cable entry modifications, or modular designs may raise the price .
- o Order Volume: Wholesale or bulk orders often reduce per-unit cost, while single or custom units are more expensive .

Supplier Options

- o Hexlon offers durable explosion-proof distribution boxes and electrical enclosures certified for Zone 1 and Zone 2 .
- o Made-in-China lists multiple manufacturers and distributors providing OEM and custom options, with pricing available upon request .
- o Gai-tronics and other suppliers provide explosion-proof speaker stations, which may include integrated distribution boxes, with prices available through online marketplaces like eBay .

Procurement Tips

- o Request a Quote: Contact suppliers directly to obtain a price list tailored to your specifications and order size .
- o Check Certifications: Ensure the product meets the required hazardous area standards for your location.
- o Consider Delivery Time: Stock items may ship quickly, but custom or OEM units can take longer to produce .
- o Compare Suppliers: Evaluate multiple manufacturers for pricing, quality, and after-sales support.

In summary, Explosion-proof Speaker Distribution Boxes do not have a fixed retail price; costs vary based on technical requirements, certifications, and customization. For accurate pricing, it is recommended to contact
