

# Price range of fireproof cable trays in Western Europe

## Article Overview

Fireproof cable trays in Western Europe typically range from EUR50 to EUR250 per meter, depending on material, design, and supplier.

## Price Range and Factors

The cost of fireproof cable trays varies widely based on material, load capacity, fire-resistance rating, and supplier type. Common materials include hot-dip galvanized steel, stainless steel, and halogen-free plastics, with steel trays generally being more expensive due to durability and fire resistance. Perforated or ladder-style trays designed for heavy power cables may also increase the price.

- o Hot-dip galvanized steel trays: EUR80-EUR200 per meter
  - o Stainless steel trays: EUR150-EUR250 per meter
  - o Halogen-free plastic trays: EUR50-EUR120 per meter
- Prices can fluctuate based on minimum order quantities, supplier location, and certification standards such as DIN EN 61537 or IEC equivalents. Custom widths, heights, or specialized coatings for corrosion resistance may further increase costs.

## Market Trends

The European fireproof cable tray market is growing due to stringent fire safety regulations and infrastructure investments, with manufacturers offering advanced fire-resistant materials like fiber-reinforced polymers (FRP) and specialized coatings. This has led to higher upfront costs but improved long-term durability, reduced maintenance, and enhanced safety.

## Cost-Benefit Considerations

While fireproof cable trays are more expensive than standard trays, they provide significant safety and operational benefits, including:

- o Reduced fire risk and compliance with safety regulations
- o Easier maintenance and cable access
- o Long-term durability in industrial and marine environments
- o Potential reduction in insurance and downtime costs

## Procurement Tips

- o Request quotes from multiple European suppliers such as Eurostrut, Ekabel24, or Latakva to compare prices

and certifications .

- o Consider bulk purchases to reduce per-meter costs.

- o Evaluate installation and labor costs, as modular and perforated designs can reduce assembly time. In summary, expect to pay between EUR50 and EUR250 per meter for fireproof cable trays in Western Europe, with the final cost influenced by material, design, fire rating, and supplier. Investing in higher-quality trays can provide long-term safety and cost savings.
