

Recommended Manufacturers of Hot-Dip Galvanized Cable Trays in Vietnam

Article Overview

Top recommended manufacturers for hot-dip galvanized cable trays in Vietnam include Dong Kwang Vina, Butraco, Artim Metal, and Superfab, all offering durable, corrosion-resistant solutions for industrial and outdoor applications.

Leading Manufacturers

1. Dong Kwang Vina Dong Kwang Vina is a prominent cable tray manufacturer based in Nhon Trach, Dong Nai, Vietnam. They produce a wide range of cable support systems, including ladder trays, solid bottom trays, perforated trays, and accessories suitable for industrial, construction, and power generation projects. Their products are known for quality, competitive pricing, and customization options to meet complex project requirements . 2. Butraco Butraco specializes in high-quality cable trays and accessories, offering hot-dip galvanized options for outdoor and coastal environments. Their HDG trays are designed to resist corrosion from salt fog, acid rain, and UV exposure, making them ideal for Vietnam's climate. They serve industries such as electrical, oil & gas, telecommunications, and manufacturing . 3. Artim Metal Artim Metal provides heavy-duty hot-dip galvanized cable trays with excellent corrosion protection and high load capacity. Their product lines include perforated and non-perforated trays suitable for industrial plants, power stations, and outdoor installations. The trays are designed for easy assembly, long-term durability, and safe cable management in harsh environmental conditions . 4. Superfab Superfab offers HDG cable trays manufactured from high-quality steel with a thick zinc coating for superior corrosion resistance. Their trays are suitable for both indoor and outdoor installations, including industrial plants, infrastructure projects, and power stations. Superfab emphasizes low maintenance, long service life, and flexible configurations to accommodate various cable layouts .

Key Considerations

- o Material and Coating: Ensure the trays are hot-dip galvanized with sufficient thickness to withstand Vietnam's humid and coastal conditions. For extreme environments, 316 stainless steel or extra-thick HDG may be preferred .
- o Customization: Check if the manufacturer can provide trays in different sizes, perforation patterns, and load capacities to match project requirements .
- o Compliance and Standards: Choose manufacturers adhering to local and international standards to ensure safety, durability, and regulatory compliance .
- o Logistics: For large projects, confirm the manufacturer can handle reliable delivery and inland transport, especially during monsoon seasons . These manufacturers are well-established in Vietnam and provide robust, long-lasting, and corrosion-resistant hot-dip galvanized cable trays suitable for industrial, commercial, and infrastructure applications.
