

Sample Price of Integrated Wiring Cabinet

Article Overview

Integrated wiring cabinets typically range from \$100 to over \$2,000 depending on size, material, and features.

Price Range

- o Small residential or home network cabinets: \$100-\$300. These are compact, wall-mounted enclosures designed for structured wiring, cable management, and home connectivity systems .
- o Medium commercial cabinets: \$400-\$1,000. Floor-standing or wall-mounted cabinets suitable for small to medium IT or electrical installations, often with modular DIN rails, cable ducts, and lockable doors .
- o Large industrial or high-density cabinets: \$1,000-\$2,500+. These include robust steel enclosures for machine control, process automation, or high circuit density installations, with high IP protection ratings (IP55 or higher), fire resistance, and optional ventilation kits .

Factors Affecting Price

- o Size and Capacity: Larger cabinets with more height, width, and depth cost more due to additional materials and space for components .
- o Material: Steel cabinets are more expensive than ABS or plastic enclosures due to durability and fire resistance .
- o Protection Rating: Cabinets with higher IP ratings (e.g., IP55, IP65) for dust and water protection are priced higher .
- o Features: Lockable doors, modular mounting plates, ventilation kits, and integrated cable management increase cost .
- o Brand and Certification: Premium brands like Schneider Electric or Legrand often command higher prices due to quality, compliance with IEC standards, and modular design .

Summary

For a typical integrated wiring cabinet, residential models start around \$100, while commercial and industrial models can exceed \$2,000 depending on size, protection, and features. When budgeting, consider the environment, number of circuits, and required protection level to select the appropriate cabinet.
